

World Schema Therapy Day 2025

Schema Therapy for Children,
Adolescents and Parents (ST-CA)

ST-CA International Programme

In addition to the rich Programme of individual Schema Therapy of this year's WSTD, we are delighted to offer a full-day international track dedicated to Schema Therapy for Children and Adolescents (ST-CA).

Our goal is to make Schema Therapy accessible to colleagues who work with younger clients. Each presentation is thoughtfully designed to be clear, engaging, and easy to follow. If you're not yet familiar with ST-CA, we recommend starting with the first presentation in our series, *Introduction to ST-CA*, as it provides a solid foundation for understanding and applying the approach in work with children and adolescents.

Language & Format

- The ST-CA track is international, and will be partly live (before lunch) and partly pre-recorded (after the lunch break).
- All presentations will be delivered in English.
- Most Recordings will be available afterwards on YouTube.

This track offers a rich and diverse range of topics, with presentations from renowned international experts who explore specialized areas of practice. The content addresses clients of all ages and backgrounds, and covers a wide spectrum of psychological difficulties across various cultural contexts and therapeutic settings—including schools, clinics, and family systems.

Together, these talks form a vibrant bouquet of insights—reflecting the spirit, creativity, and many dimensions of Schema Therapy for children, adolescents, parents, and beyond. We warmly invite you to join us and be part of this inspiring event!
